DETAILED ACTION

Allowable Subject Matter

1. Claims 1 – 7 and 9 are allowed over the prior art of record.
2. The following is an examiner's statement of reasons for allowance: The prior art of record fails to teach, disclose or suggest wherein the semiconductor substrate is provided with a plurality of cells each including a contact hole and the ratio of the amount of silicon contained in the silicon-containing thin film formed in the region having the predetermined area per unit cell to the amount of aluminum supplied to a unit cell in the step of forming the aluminum thin film is not less than 0.1% and not more than 2% by atomic ratio in combination with the remaining limitations of the claim. The reference of Hsu in particular discloses a substantially different invention in that Hsu utilizes an aluminum-copper alloy instead of an aluminum film. Furthermore, Hsu discloses that the aluminum film would have inherent problems if small fractions of silicon are diffused in the aluminum film.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
